Before & After

KITCHENS

PHOTOGRAPHY: MIKE CHAJECKI

Mix & Match

A mix of painted MDF and white oak with a warm stain gives the space visual depth and a sense of balance.

Before

ALL TOGETHER NOW

The design focused on creating a functional, family-friendly kitchen with ample storage and space to entertain. The new layout supports daily cooking and larger gatherings, maximizing efficiency without compromising on style.

Favourite Features

- The cabinetry extends along the main wall – perfect for storing dishware and serving pieces – to evoke the feel of custom furniture. The glass fronts and white oak soften the monochrome aesthetic and help open up the linear layout.
- The long island provides additional prep space and serves as a hub for entertaining guests.
- The contrast of the island's darker charcoal quartz with bold veining is a dramatic focal point that also adds a touch of sophistication.
- Using durable white quartz for the main countertops and backsplash makes for a sleek, low-maintenance surface.
